

## Lab02 Report

Name: Li, Xintong

UPI: xli295

Course: Cs280

1. How did you go about completing each task and how does each solution work?  
I reviewed the knowledge taught in lectures and tried to finish the tasks using these knowledge and eventually each solution works well.
2. What difficulties did you face while attempting these tasks?  
I got stuck in question 3 that is the logger one and didn't know where to start at first.
3. What did you learn from the tasks?  
I learned how to unit test and understood how this operation works.
4. How do you think this lab will help you in understanding software development?  
Through this lab, I get to know how unit testing works basically and familiar with the operation process. It is not enough to learn concepts and practice is important.
